OBJECTIVE

I'm looking for full-time work in the role of Senior Software Engineer in the IT and telecommunications industry.

PERSONAL STATEMENT

I am a highly competent software developer with five years' experience developing a wide range of projects for a range of clients.
I have proven expertise in building websites and projects.
I understand the project lifecycle in depth and am very capable at all aspects of development from project planning to requirements gathering through to writing and testing code, creating documentation and support. I am currently seeking long-term contract positions which will allow me to further improve my project management skills.
